Summary

Full-stack developer experienced in building product-focused web applications, REST APIs, microservices, real-time systems, and AI-enabled platforms. Skilled in React, Next.js, Node.js, Python, PostgreSQL, and Docker, with proven leadership and hackathon success.

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, C++
- **Frontend:** React.js, Next.js, HTML, CSS, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, FastAPI, Django, Flask, REST APIs
- **Databases:** PostgreSQL, MongoDB, MySQL, ArangoDB, SQLAlchemy ORM
- **Tools & DevOps:** Docker, Docker Compose, Git, GitHub, Cloudinary, FFmpeg
- **AI & Integrations:** Groq API, LLaMA 3.3-70B, Hugging Face Transformers, Figma API

Experience

House of Couton Pvt. Ltd. Jan 2025 – Dec 2025

Web Developer Intern

- Developed full-stack applications for marketing, human resources, and management research teams.
- Translated business and research requirements into production-ready platforms using MERN, Django, Flask, and PostgreSQL.
- Built scalable REST APIs, database workflows, and third-party integrations in collaboration with cross-functional teams.

Waysorted Project Experience

Backend Developer

- Developed the backend for a real-time Figma plugin, delivering 15+ REST APIs for authentication, synchronization, plugin operations, and Figma API integration.
- Diagnosed and resolved cross-service integration issues across the plugin, web application, and Flask newsletter service by tracing authenticated product-event and subscriber workflows.
- Configured and validated the seven-day inactivity email journey through a controlled canary-to-eligible-user rollout, with zero recorded delivery failures or queue backlog; established a reproducible local setup with 34 passing tests.

Projects

MapMyFlight

GitHub | Live

- **What it does:** Creates cinematic, downloadable animations of flight journeys between user-selected locations.
- **Built:** Implemented route generation, aircraft motion, map transitions, video compositing, and an inline preview experience.
- **Tech:** Python, React, map and geolocation APIs, FFmpeg.

Real-Time Crime Signal Detector

GitHub

- **What it does:** Monitors Reddit content to surface potential crime-related signals and map referenced locations for situational awareness.
- **Built:** Developed the NLP pipeline, location extraction and geocoding workflow, and map-based visualization of unverified reports.
- **Tech:** Python, NLP, Reddit data, geocoding and mapping APIs.

VerifAI
GitHub

- **What it does:** Helps college placement teams compare student profiles with job descriptions through LLM-assisted analysis.
- **Built:** Architected five asynchronous FastAPI services for resume, coding-profile, marksheet, and job analysis; designed the data model and file-storage workflow.
- **Tech:** Next.js, FastAPI, PostgreSQL, Groq API, Cloudinary, Docker Compose.

Education

Dr. A.P.J. Abdul Kalam Technical University 2023 – 2027
B.Tech in Computer Science and Engineering

The Union Academy Senior Secondary School Completed 2023
Senior Secondary Education (Class XII)

Achievements & Leadership

- **Google Developer Groups on Campus Lead (2025–26):** Selected to lead the campus developer community and technical initiatives.
- **Two-Time College Hackathon Winner:** Won two college-level hackathons by building and presenting solution-focused technology projects.
- **Smart India Hackathon 2025:** Selected for the external round from a pool of 145+ teams.
- **AWS Young Builders Challenge 2023:** Ranked among the top 11 teams nationally.
- **Bank of Baroda × Microsoft Hackathon 2024:** Ranked among the top 20 teams nationally.
