Summary

Backend and full-stack developer building product-focused applications with TypeScript, Node.js, Python, FastAPI, PostgreSQL, and Docker. Experienced in API design, asynchronous service integration, background workflows, media processing, and production debugging.

Experience

Waysorted Sep 2025 – Sep 2026
Part-time Backend Contributor *Remote*

- Built backend capabilities for a real-time Figma plugin, including 15+ REST APIs for authentication, synchronization, and plugin operations.
- Diagnosed cross-service product-event and subscriber workflows spanning the plugin, web application, and Flask newsletter service.
- Validated a seven-day inactivity-email journey through a controlled canary-to-eligible-user rollout, clearing queued work with zero recorded delivery failures.

House of Couton Pvt. Ltd. Jan 2025 – Dec 2025
Web Developer Intern *Delhi NCR*

- Built full-stack internal applications for marketing, human-resources, and management-research teams using MERN, Django, Flask, and PostgreSQL.
- Translated requirements into REST APIs, database workflows, and third-party integrations with cross-functional stakeholders.

Projects

DOT Music | *React, TypeScript, Tauri, YouTube IFrame Player API* GitHub

- Built a macOS-first desktop music client with custom search, queue, playback controls, and a persistent player synchronized with YouTube playback events.
- Designed the React and Tauri application boundary for a focused desktop experience while keeping media delivery with the source platform.

VerifAI | *Next.js, FastAPI, PostgreSQL, Docker Compose* GitHub

- Built a placement-intelligence platform that compares student profiles with job descriptions through LLM-assisted analysis and structured fit scoring.
- Architected asynchronous FastAPI services for resume, coding-profile, marksheet, and job-description analysis; containerized the stack with Docker Compose.

MapMyFlight | *Python, React, Mapping APIs, FFmpeg* GitHub

- Built a travel-visualization tool that generates animated flight journeys with route generation, aircraft motion, map transitions, and downloadable FFmpeg-composited video.

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL, C++
Backend: Node.js, FastAPI, Express.js, Django, Flask, REST APIs, asynchronous HTTP
Data: PostgreSQL, MongoDB, MySQL, SQLAlchemy, Redis
Frontend: React, Next.js, Tailwind CSS, HTML, CSS
Infrastructure: Docker, Docker Compose, Git, GitHub, Cloudinary, FFmpeg
Integrations: Figma API, YouTube IFrame Player API, Groq API, Hugging Face Transformers

Education

Dr. A.P.J. Abdul Kalam Technical University 2023 – 2027
B.Tech in Computer Science and Engineering *Uttar Pradesh*

Achievements

- **Smart India Hackathon 2025:** Selected for the external round among 145+ teams.
- **AWS Young Builders Challenge 2023:** Ranked among the Top 11 teams nationally.
- **Bank of Baroda × Microsoft Hackathon 2024:** Ranked among the Top 20 teams nationally.
